MIXTURE OF FLUORINATED POLYETHERS AND USE THEREOF AS SURFACTANT

ABSTRACT

The present invention provides the use of a fluorinated polyether composition as a surfactant, said fluorinated polyether composition comprising a mixture of fluorinated polyethers of the formula:

$$(R_f)_{n}-X_{w}-Z \qquad (I)$$

wherein n is 1 or 2, w is 0 or 1, X is a divalent or trivalent organic linking group, Z is a polar group selected from the group consisting of an acid group or a salt thereof, an ammonium group, an amine-oxide group and an amphoteric group, and R_f represents a perfluorinated polyether group of the formula:

$$CF_3CF_2CF_2$$
-O- $[CF(CF_3)CF_2O]_k$ - $CF(CF_3)$ -

wherein k is at least 1;

said mixture of fluorinated polyethers having a weight average molecular weight between 750 g/mol and 5000 g/mol and the amount of perfluorinated polyether groups in said mixture where k is 2 or less, is not more than 10% by weight of the total amount of perfluorinated polyether groups in said mixture.
